Pipeline Services International (PSI) Surpasses Key Milestone

Houston, Texas – Pipeline Services International (PSI) is proud to announce that they have completed over 100 projects since starting operations in 2008. The relatively new company was able to gain market share, and produce a profit within its first year of operations, a significant achievement in a competitive market. PSI has also expanded their offerings to the onshore and the offshore markets, with the introduction of an extensive line of specialized Pigs for pipeline cleaning, pipeline inspection and flow assurance.

“We are extremely pleased that our customers have responded, proving our business model that indicated a need for a high quality, responsive and reliable service provider”, commented Gordon Barksdale, President of PSI. “We’re beginning to address the onshore markets with the same level of service and reliability”.
